

EASY LTO

No other solution on the market can provide you with the power, speed, safety and simplicity of EasyLTO. Don't risk your important footage and creative projects by leaving them on drives stacked on desks, shelves and in cabinets. For users of other LTO systems we also support importing third party catalogs straight into EasyLTO*

60% of all businesses that experience catastrophic data loss go out of business within 6 months¹, so isn't it time you implemented a professional backup and archive solution? EasyLTO by GB Labs gives you the power to put a real backup and archive solution that will keep your business running and protect your assets for 30 years with LTO tape technology.

Why SmartBackup?

The SmartBackup option adds critical functionality to your system that will simplify backup and archiving while safeguarding your creative projects like no other solution. The SmartBackup system provides a powerful integrated nearline storage protected by Raid 5* and powered by GB Labs science to create turnkey backup configurations.

- Backup - Safeguard your project files and assets to EasyLTO
- Automate - Let EasyLTO archive your projects to tape automatically
- Migrate - Transfer existing libraries to larger LTO 6 or LTO 7 tapes
- Cloud integration - Exchange data with Cloud services such as Amazon S3
- Universal - Create Workspaces everyone can connect to via SMB/AFP/NFS/HTTP
- Instant Access - Recently archived projects on tape are still available in seconds

LTO
MANAGER

Demand your LTO system uses HyperWrite!

GB Labs developed the HyperWrite technology to significantly reduce the time it takes to write to tape using TAR while extending the life of your LTO tape and drive. Typical LTO systems pause after each file is written. Typical LTO systems can take all day to finish a single job. GB Labs crushes long write times by writing at native LTO speeds of 300MB/s even with thousands of small files like animation or image sequence movie files. By intelligently optimising the process there is a massive reduction in the wear to the LTO tape itself as well as the drive. If you need a truly professional and safe system to use in your archiving process EasyLTO with HyperWrite is the only choice.

The HyperWrite advantage
